October 22, 2024

Dear Hiring and Executive Team,

I'm excited to be able to apply for the role of Engineering Manager here at CipherHealth! Thank you in advance for not only this opportunity, but all of the opportunities and responsibilities that make this feel like a natural progression in my career at CipherHealth.

I'm confident that my abilities and Business Impact are familiar to you already, so I'll be brief:

I have demonstrated an existing leadership ability that continues to evolve as I adapt my skills to the tech industry, as well as a rapid technical growth and an ability to "zoom out" that is uniquely suited for the Engineering Manager position.

In my time as Scrum Master, I have helped multiple teams maintain high levels of delivery and output while consistently delivering on top-down endeavors such as Data Hygiene, Bug Queue Reduction, and Swimlane Allocation.

One of my core management philosophies is "Protect the Team." I take pride in the positive feedback I receive during check-ins, which reflects my commitment to fostering an environment that enables both high performance and team well-being.

Thank you all again for opportunities past, present, and future.

Sincerely,
Ben Z
